

Manufacturing Tours:

It is best to give each of the manufacturers at least a two-week notice. Please understand that there may be times that these facilities will not be open for tours. Kawasaki's guidelines work well for all manufacturing facilities.

Kawasaki Tour guidelines: Children under 12 years of age are not allowed on the production floor.

No shorts or open-toed or open-heeled shoes are allowed on the production floor.

Cameras, camcorders, cell phones and recording devices of any kind are strictly prohibited in the Kawasaki facilities, unless previously authorized in writing by the Plant Manager.

Safety glasses must be worn at all times on the production floor and will be provided.

Visitors must stay in the aisles and with the tour guide at all times.
